

Afolabi Ridwan Damilare

Frontend Developer

Osogbo, Nigeria | damilare791@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

I am a Frontend Developer who excels at bridging the gap between sophisticated backend logic and the human experience. With over 4 years of experience, I specialize in building web applications that don't just function, they feel fast, intuitive, and accessible. From architecting high-performance systems for HRIS platforms to scaling food delivery solutions to over \$30,000 in revenue, I focus on delivering interfaces that solve real-world business challenges. I am passionate about crafting pixel-perfect, performant code that drives measurable growth and elevates the user experience.

Core Skills

Technical Skills

- **Languages/Frameworks:** TypeScript, JavaScript (ES6+), React, Next.js
- **Styling & UI:** Tailwind CSS, Shadcn UI, Framer Motion, GSAP.
- **State & Data:** Redux Toolkit, Context API, Zustand, REST API, Axios. Zod, Formik
- **Tools & Backend:** Git & GitHub, Vercel, Figma, Lighthouse, Recharts, Supabase, Google Places API, Node.js (Express.js), Asynchronous Communication, Remote Collaboration, Security Best Practices.

Professional Experience

OpenRole AI | AI Job Application Platform

- Created a job seeker platform that reduces the manual effort of searching, preparing, and tracking applications by combining onboarding, profile management, AI document generation, auto-apply tracking, and application history in one workflow.
- Designed the experience around readiness, not just screens, subscription plans, usage limit, billing history, payment updates, cancellation handling, trial activation, and chrome extension connection were built into the product flow.
- Improved user trust and reliability with protected dashboard routes, safe redirect checks, trusted OAuth/payment URL validation, secure headers, consistent error handling, loading states, and typed data models.
- Built AI assistance features for resumes, cover letters, and profile summaries so users can present themselves faster and with stronger job.

Adaptibles – Inclusive Learning Platform | Frontend Engineer (Contract)

- Improved learning conversion and purchase confidence by shaping course discovery, course details, wishlist, cart, coupon, checkout, and post-payment flows around clear pricing, access state, and direct paths from browsing to learning.

- Reduced frontend complexity across learner and creator's dashboards by organizing reusable UI patterns, API driven states, loading states, empty states, and error feedbacks so the product felt more reliable, accessible, and easier to maintain.
- Improved accessibility and learner support by supporting screen-reader-friendly interface, stronger colour contrast, clear focus state, semantic controls, captions, accessible resources links, and chatbot-assisted guidance within the learning experience.

HRIS | Frontend Developer (Contract)

Remote | Oct 2025 – Jan 2026

- **Engineering a secure Authentication System** featuring Role-Based Access Control, Google OAuth integration, and an automated token refresh mechanism using Axios interceptors to maintain seamless user sessions.
- **Developed a sophisticated Leave Management System** supporting multiple leave types, half-day request and a real time balance tracking dashboard for employees.
- **Built complex, multi-step onboarding flows** and administrative interface for bulk employee data management, utilizing **React Hooks Form and Zod** for rigorous schema validation.

Leban Street | Frontend Developer (Contract)

Remote | Aug 2025 – Oct 2025

- Engineered a “Smart Cart” that increased the checkout efficiency by 25% by implementing session persistence and streamlined multi-order batching.
- Developed an API-driven delivery management module integrating Google Places API for address validation, automated fee calculation, and multi-address checkout flows.
- Built a real-time Admin & Kitchen Dashboard using the Recharts for analytics and SWR for live order status updates, improving operational efficiency.
- Designed a mobile-first UI component library with Shaden UI components, ensuring a seamless, accessible UX across mobile and desktop devices.

BeautySpaceng | Frontend Developer (Full-time)

Remote | Jan 2022 – Jan 2024

- Spearheaded the architectural migration from a legacy React SPA to Next.js, leveraging SSR and ISR to boost organic SEO traffic and slash initial page load times by 40%.
- Audited and resolved performance bottlenecks using Lighthouse, resulting in a 20% uplift in Core Web Vitals and a significantly smoother user experience on mobile devices.
- Integrated complex RESTFUL APIs using Axios and TanStack Query, implementing efficient data fetching, caching, and state management to ensure a seamless user experience.
